

## ***YOU'RE INVITED***

**Borgford BioEnergy LLC Presentation  
Springdale High School Performing Arts Room  
February 17th @ 6:30 pm till 8 pm**

**Dale Borgford, Borgford BioEnergy LLC, will present information on current activity and future plans for the Springdale and Kulzer millsites. This will be a Power Point presentation with a question and answer time following.**

Borgford BioEnergy LLC designs, manufactures, engineers and installs energy systems. The basis of these energy systems is the Octaflame gasifier which is designed to handle biomass in a highly efficient manner while maintaining a low carbon footprint. They specialize in small scale localized co-generation systems that have the potential to:

- Create products from materials currently viewed as a liability or waste.*
- Increase the growth of high quality timber through thinning opportunities.*
- Provide jobs and revenues to rural economies.*
- Make energy based on renewable resources.*
- Utilize low value stumpage and slash.*
- Reduce fuel load in the local forests.*
- Build renewable energy industry for local areas.*
- Establish year around employment.*

The completion of these systems is going to have a positive impact on Springdale, Valley and the surrounding areas. It will boost the economy by creating more jobs and trickle down opportunities for more businesses in the area. This is going to be a good thing for our area and if you want to know first hand what the future plans are, please attend this event. You will be glad you did!!

***Hosted by Springdale Area Chamber of Commerce***
